Classic outside; classy inside. Attention to detail is visible throughout this newly renovated ranch, with a layout designed to please today's buyers. Step in and see a wide open interior, with hardwoods in the living and dining rooms. And that kitchen! Quartz countertops and new cabinetry combine with all new appliances, including a gas stop, hood vent, and yes, even a pot filler! More than one can comfortably work at once in this kitchen: the huge island offers great work space, storage and seating. Plus there's room for either casual or formal dining. A split bedroom plan provides privacy to the primary suite, with its large walk-in closet, custom tiled shower - and you'll love the pops of color in the double bathroom vanity. New HVAC, hot water heater and windows are a few of the additional updates. The basement offers a large flexible family room and bath. All of this is nestled nearby one of Cape's loveliest park-side neighborhoods. It's ready and waiting just for you.
